1. INTRODUCTION

The health and welfare of athletes and all others attending an event is a primary concern of FIH and therefore of the host/LOC. A FIH Medical Officer is therefore appointed to selected FIH events, but other facilities and support are also required as part of the hosting responsibilities. This manual is providing each host with information on all medical provisions and procedures which need to be in place for their respective events.

There is a minimum level of services and facilities which must be provided at every event; this is referred to below as 'level A'. If this level of service is not available, the competition should not proceed. Other highly recommended and preferable levels are also specified in this document.

The facilities required include a medical room suitably equipped together with equipment at pitch side. Local personnel is also important, especially a local doctor and, as appropriate, other first aid or ambulance professionals.

The Local Organizing Committee (LOC) is responsible for the contacts and arrangements of medical services, which should be planned and prepared in consultation with the Local Medical Officer the LOC intends to appoint.

2. MEDICAL FACILITIES

2.1 MEDICAL ROOM

A medical room must be provided at the playing venue. It should be located with good and quick access to the field of play and other technical areas.

The room should be well lit and lockable. A sink with hot and cold water is required together with soap and towels. Ideally, a toilet should be in a separate room off the Medical Room or nearby.

The furniture required is:

- Dedicated area and desk for the FIH Medical Officer and Local Medical Officer Chairs;
- Two treatment tables;
- Lockable cupboard.

The absolute minimum (level A – without which a competition should not proceed) treatment facilities required are:

- Stretcher;
- Sterile stitching materials;
- Splints;
- Oxygen and means of administering it;
- Sufficient pain medication (e.g. tramadol/morphine) (noting that these substances are prohibited in sport but can be used in an emergency with a TUE applied for);
- Spinal board;
- Medical collar;
- Automatic external defibrillator (AED);
- Stethoscope;
- A handout providing information about medical support and facilities available.

The following are highly recommended (level B):

- Sterile/non-sterile bandages (e.g. elastic bandages), slings, Band-Aid type dressings, tape;
- Basic medicines;
- Medicines for gastrointestinal disorders;
- Intravenous equipment and sterile fluids for treatment of severe heat exhaustion (noting that this should only occur in hospital settings and intravenous infusions and/or injections of more than 50 ml per 6 hour period are prohibited except for those legitimately received in the course of hospital admissions or clinical investigations);
- Dispenser for the disposal of used sharp, sterile and non-sterile equipment
- Cold packs;

- Wound dressings;
- Gloves;
- Blood pressure device.

The following are preferable (level C):

- Otoscope;
- Aspirix (or a suitable equivalent for treating insect bites);
- Emergency tracheotomy device;
- Wheelchairs;

2.2 FIELD OF PLAY

Equipment required (level A – without which a competition should not proceed) beside each competition field of play is as follows:

- Stretcher;
- Wood, aluminium or air splints for fractures of upper or lower limbs;
- First aid materials;
- Seating for a doctor and stretcher bearers;
- Spinal board;

The equipment (and related personnel) should be located as centrally as possible in the technical area without interfering with the technical table, team benches and the flow of participants.

As noted in the section of this manual on technical requirements, a member of staff in the pitch management team must be suitably located and equipped to clean the pitch of any blood stains.

2.3 AMBULANCE

It is a level A requirement (without which a competition should not proceed) to have a fully equipped ambulance (or similar arranged transport) with a driver on standby with paramedics available. It must be positioned near the field of play with unobstructed access to the field and exit from the venue.

2.4 PERSONNEL

A key role in addition to the FIH appointed Medical Officer (FMO) is the Local Medical Officer (LMO) appointed by the Local Organizing Committee. The LMO provides support to and augments the services provided by the FMO.

The duties of both the FMO and LMO are described below:

FIH MEDICAL OFFICER (FMO)

1. The FMO is a registered medical practitioner.
2. The FMO is a member of the FIH technical officials' team at the event.
3. The FMO is directly responsible to FIH's on site Sport Operations Manager. The FMO works in close cooperation with the Local Medical Officer as well as the FIH Sport Operations Manager.
4. The FMO serves as the conduit for the medical care of all those who may be involved with the event and is not expected to render care except in a medical emergency. The FMO can act as a doctor on the pitch if requested. The FMO also has a direct responsibility of the medical care of appointed FIH officials.
The FMO can only practice medicine at the event location or the hotel.
5. The FMO is responsible for ensuring (through the LMO as appropriate) that all necessary medical related facilities are provided, and procedures established.
6. The FMO ensures that the doping control facilities are set-up and suitable, in conjunction with FIH's Sport Operations Manager and the Local Medical Officer.
7. The FMO is responsible for ensuring distribution and collection of injury forms from medical personnel. At the end of the event the FMO supplies a full medical report to FIH including a summary of the injury information.
8. The FMO may be asked to participate in FIH research projects.

LOCAL MEDICAL OFFICER (LMO)

1. The LMO is a registered medical practitioner in the country in which the event is taking place.
2. The LMO is a member of the team of local officials.
3. The LMO is directly responsible to the FMO. The LMO works in close cooperation with the FMO and the organisers of the event.
4. The LMO is responsible for organising and implementing the entire medical facilities available for the duration of the event from the arrival of the first participants to departure of the last (this includes Event Officials).
5. The LMO is responsible for ensuring the arrangements for hospital, ambulance, specialist care, medical coverage of every game played, enough availability of medication and access to these as well as relevant communications.
6. The LMO arranges for the set-up of doping control facilities and supervises its order.
7. The LMO provides support for the FMO as required by the FMO.

Note: The FIH Medical Officer and Local Medical Officer should not be the same individual, unless specifically approved by FIH.

A local doctor must be on duty at each competition field of play during all matches. It is acceptable for a team of doctors to be rostered to provide this cover.

It is imperative that a local doctor must be present one hour before the first match starts until one hour after the last match each day. Again, without a doctor present a competition should not proceed.

Well-equipped and experienced first aid personnel, who can work together with the FMO and LMO as a team must also be available.

In addition to the Local Medical Officer, it is desirable that physiotherapy services are available for umpires and other officials. It is excellent if this is available throughout the event and located at the venue, but a callout service or urgent appointments at a nearby practitioner are acceptable.

If a team does not have its own doctor, the FMO must be prepared to assist the team more intensively. This may also be necessary if a team doctor is not present, e.g. because they are accompanying a player to the hospital.

2.5 INFORMATION

Information is also a key part of the service provided by a Local Organising Committee. In consultation with the Local Medical Officer, the following information should be compiled:

- Location of and services available at hospitals; if necessary, a combination of hospitals should be researched to ensure that the full range of facilities potentially required is available. For example, a nearby hospital may be useful and accessible for some services but it may be necessary to travel further for some specialised services;
- Location of dental services including emergency treatment outside normal hours;
- Local and opening hours of pharmacies in relation to both the venue and event hotel;
- Possibilities for sterilize equipment;
- Telephone numbers and addresses related to the above and to the LMO;

The liabilities for paying for treatment and services for team players and officials must be set out clearly together with the method of payment and any implications for identification and insurance.

This information should be compiled at least four weeks before the competition starts. It should be available in a handout for all teams and officials.

3. ACTIONS PRIOR TO ARRIVAL AT THE VENUE

3.1 TRAVEL EXPENSES

FIH MEDICAL OFFICER	LOCAL MEDICAL OFFICER
<p>Return travel expenses are to be paid by the Local Organising Committee (LOC) as follows:</p> <ul style="list-style-type: none"> • If by air/or sea, based on economy class air fares; • If by rail/or road, based on 1st class railway fares. 	<p>Travel expenses are subject to agreement with the Local Organising Committee (LOC), but would usually be as follows:</p> <ul style="list-style-type: none"> • If by air/or sea, based on economy class air fares; • If by rail/or road, based on 1st class railway fares.
<p>The return ticket, unless otherwise agreed, should reach the FMO 60 days before the start of the competition, as specified in the Hosting Agreement.</p>	
<p>An invitation letter for visa or any transit visa purposes should be requested from the LOC, the costs of which are at the account of the host.</p>	
<p>If the FMO has any trouble with travel arrangements and/or visa, (s)he should immediately report this to the FIH Office.</p>	

3.2 ACCOMMODATION EXPENSES

FIH MEDICAL OFFICER	LOCAL MEDICAL OFFICER
<p>In accordance with the Hosting Agreement, the accommodation expenses (full board – single room accommodation in the FIH staff event hotel) of the FMO are to be paid by the LOC.</p>	<p>Accommodation expenses are subject to agreement with the LOC but would usually be full board in a good quality hotel with the other officials.</p>
<p>Expenses are payable as specified in the Hosting Agreement.</p>	
<p>If circumstances (e.g. unavoidable flight schedule) make it necessary, the duration of stay is to be extended until such time as it is materially possible for the FMO to undertake the journey to the event or home on the most direct route.</p>	

3.3 CONTACTS

FIH MEDICAL OFFICER	LOCAL MEDICAL OFFICER
Contact FIH's event Sport Operations Manager in advance to advise arrival date and time.	Contact the LOC in advance to advise arrival date and time.
Make prior arrangements with FIH's event Sport Operations Manager to meet and to determine the date, time and place of the medical pre-event briefing meeting.	Make prior arrangements with the OC to meet relevant organisers to check local facilities.
Ask the FIH Office for contact information for the OC when advising them of the panel appointments.	Check whether the appointed FMO must fulfil any local requirements to be permitted to act in the host country.
Ask the OC for contact information for the LMO.	Arrange to meet the FMO before the event starts to inspect the medical facilities jointly and to finalise arrangements for the pre-event medical briefing.
Contact the LMO to check whether you must fulfil any local requirements to be permitted to act in the host country.	
Arrange to meet the LMO following your arrival and before the event starts to inspect the medical facilities jointly and to finalise arrangements for the pre-event medical briefing. If needed, visit the local Hospital and Dentistry facilities.	

3.4 DOCUMENTATION

FIH MEDICAL OFFICER	LOCAL MEDICAL OFFICER
<p>Ensure (by checking with the FIH Office if necessary) that you have up-to-date copies of the following documents:</p> <ul style="list-style-type: none"> • Olympic Movement Medical Code; • FIH Anti-Doping Rules; • WADA Prohibited List (of prohibited substances and methods); • related WADA International Standards; • FIH inclement weather, nutritional and other relevant guidelines; • Injury reporting forms (being the Match Injury Report, Medical Incident Report, Serious Injury, Injury Summary, pre-notification form, Temperature & Humidity form). 	<p>Ensure (by checking with FMO if necessary) that you must have up-to-date copies of the following documents:</p> <ul style="list-style-type: none"> • Olympic Movement Medical Code; • FIH Anti-Doping Rules; • WADA Prohibited List (of substances and methods); • Related WADA International Standards.
<p>If it has not already been received, ask the FIH Sport Coordinator for an extract from their TUE database of current TUEs granted to participating team players.</p>	

3.5 PREPARATION

FIH MEDICAL OFFICER	LOCAL MEDICAL OFFICER
<p>Liaise with the LMO and/or LOC to check that necessary facilities are being organised. Although it might be difficult to verify off-site and in advance that facilities are being organised, it can be helpful to check as much as possible in advance.</p>	<p>Liaise with the FMO and check that the LOC is providing all necessary medical requirements; provide professional advice as necessary.</p>
<p>Prepare medical pre-event briefing (see the next section). Note that a PowerPoint template will be provided by FIH to be used at the briefing.</p>	<p>Ensure adequate accreditation to allow admittance to all event facilities. LMOs and other acting local doctors should have total access.</p>
<p>Ensure adequate accreditation to allow admission to all event facilities.</p>	
<p>Prepare all paperwork that will be distributed during the medical briefing.</p>	

4. ACTIONS AFTER ARRIVAL AT THE VENUE & BEFORE THE START OF THE TOURNAMENT

4.1 CONTACTS

FIH MEDICAL OFFICER	LOCAL MEDICAL OFFICER
Contact FIH's event Sport Operations Manager, LOC, and LMO.	Contact the LOC and FMO.
Liaise with FIH's event Sport Operations Manager to arrange a general check of medical facilities; undertake a detailed check in liaison with the LMO.	Liaise with the FMO to undertake a general check of medical facilities.
Check if medical facilities, mobile phone, Wi-Fi, etc are available.	

4.2 SPECIFICATION OF MEDICAL FACILITIES

FIH MEDICAL OFFICER	LOCAL MEDICAL OFFICER
Note the host organiser's contractual requirements at FIH events in relation to medical personnel / facilities (including a second site if relevant); if necessary, ask the FIH Office for a copy. (NB: requirements vary at different levels of events.) Broadly, the requirements are as follows:	Note the host organiser's contractual requirements at FIH world level events in relation to medical personnel / facilities (including a second site if relevant); if necessary, ask the OC or FIH Office for a copy. (NB: requirements vary at different levels of events.) Broadly, the requirements are as follows:
<p>(i) Personnel</p> <ul style="list-style-type: none"> • A local doctor must be on duty at the competition field of play during all matches, including the warm-up period; • Stretcher bearers must be on duty at the competition field of play during all matches, including the warm-up period – it should be ensured that local medical staff are adequately skilled/trained to deal with emergencies, including use of spinal boards and splints, placing athletes on stretchers, etc.; • Person allocated with responsibility to clean pitch from blood stains; • Dental emergency facilities (e.g. a dentist nearby). 	
<p>(ii) Equipment</p> <p>The provision of the following equipment is required next to each of the competition fields of play:</p>	

FIH MEDICAL OFFICER

LOCAL MEDICAL OFFICER

- Stretcher at or near the Technical Officials' table;
- Seating for stretcher bearers;
- Spinal board (in case of neck / spinal injury);
- Wood, aluminium or air splints for fractures of upper or lower limbs;
- Ambulance service (fully equipped, ensuring unobstructed access to the field of play and for exit from the venue).

(iii) First Aid Room

Supervised by local doctor on duty – must be set up and equipped with:

- Dedicated area and desk for FIH tournament Medical Officer;
- Two treatment tables;
- Adequate lighting;
- Facilities for suturing cuts;
- Sterile / non-sterile bandages (e.g. elastic bandages), slings, band-aid type dressings, tape;
- Basic medicines;
- Analgesics (oral and injectable) including morphine, medicines for gastrointestinal disorders;
- Oxygen and means of administering it;
- Intravenous equipment and sterile fluids for treatment of severe heat exhaustion (in tropical zone);
- Adequate splints and availability of morphine are essential;
- Means of disposal of used sharp, sterile and non-sterile equipment.

(iv) Doping Control Station

A doping control area must be provided at the competition venue. It should comprise of a waiting room, a doping control room and a toilet facility. This area must be reasonably separated from public activities, secure, private and reserved solely for dope testing purposes. Only individuals involved with testing are permitted entry to the Doping Control Station. Ideally the waiting room, doping control room and toilet are adjacent. The required material as mentioned in the applicable FIH Anti-Doping Rules must be available together with relevant WADA documents (e.g. Prohibited List and International Standard for Testing). A copy of the current FIH Anti-Doping Rules may be obtained from the FIH website: <http://www.fih.ch/inside-fih/our-official-documents/anti-doping-and-medical/>

- a. Waiting Room containing
 - Seating for athletes, athletes' representatives, and chaperones;
 - Facility for sealed non-caffeinated and non-alcoholic drinks, which includes a mix of natural mineral water and soft drinks (cool box or refrigerator);
 - Garbage bin.
- b. Doping Control room:

Must be highly secure and lockable and the doors must not be left open. The news media shall not be admitted to the Doping control station and no photography or filming shall be permitted during the hours of operation. Ideally the room is to be adjacent to the waiting room and the toilet. The Doping Control Room should contain:

 - Lockable fridge;

FIH MEDICAL OFFICER	LOCAL MEDICAL OFFICER
	<ul style="list-style-type: none"> • Table and three (3) chairs (Doping Control Officer, athlete, athlete's representative); • Pens and paper; • Forms to notify athletes and for Doping Control Records; • Laboratory collection acknowledgement forms and chain of custody forms; • Trained personnel (including Doping Control Officer and with all staff suitably accredited) to monitor and chaperone the athlete selected to be tested; • Enough collection bottles/kits. Check that sample collection kits are not expired.
	<p>c. Toilet</p> <p>The toilet must be private, clean and equipped and should be large enough for the DCO to be able to directly observe the competitor providing the sample and adjacent or as near as possible to the Doping Control room. A disabled person's toilet is ideal but not essential.</p>
	<p>(v) Care of Umpires</p> <p>An appropriate facility/ability to treat and care for the umpiring panel, including massage facilities with local physios should be available.</p>

4.3 INSPECTION OF MEDICAL FACILITIES

FIH MEDICAL OFFICER	LOCAL MEDICAL OFFICER
Based on the above requirements, check the medical facilities:	
	<p>Is the treatment room conveniently sited? Not too far from the field of play?</p> <p>Is there suitable space and equipment for suturing minor wounds?</p> <p>Is there a suitable supply of dressings, slings, splints, sterile and non-sterile bandages (e.g. elastic bandages), basic medicines, analgesics (oral and injectable) including morphine, medicines for gastrointestinal disorders, intravenous equipment and sterile fluids for treatment of severe heat exhaustion, blankets for warming and fans?</p> <p>Is the medical room staffed during the tournament?</p> <p>Check the ambulance availability and where it will be positioned during matches (ambulance access and departure must be unobstructed). Check the facilities in ambulance including resuscitation and intravenous equipment.</p> <p>Check arrangements for a replacement if the ambulance is in use.</p> <p>Check that the stadium can be evacuated quickly in case of an emergency and check the security arrangements. In case there is a security manager at the event, the communication with her/him should be established.</p>

FIH MEDICAL OFFICER

LOCAL MEDICAL OFFICER

Ensure that local medical specialists are aware that there is a tournament in progress and are available; this should include but not be limited to radiology, dentistry and plastic surgery.

Ensure that a stretcher is placed near the technical officials' table and that stretcher bearers are available throughout each match, including the warm-up period.

Ensure that splints for upper and lower limb injuries and a spinal board are in place and easily accessible from the field of play (preferably located near the Technical Officials' table).

Determine where the LMO will be during the tournament, bearing in mind that a roster of Medical Doctors can be utilised for each match. Determine the means of communication between FMO, LMO and other medical staff.

Draw the LMO's attention to the possibility that some teams may have a physiotherapist but no doctor, and some may have neither a physiotherapist nor doctor, so the LMO may need to treat the team in case of injury.

Check changing rooms for teams and umpires for a suitable place for pre-match physiotherapy. Check the arrangements for medical care of the Technical Officials, including the umpires.

Work with FIH's event Sport Operations Manager and LMO to ensure all medical provisions are in place and to the agreed level.

Check the Doping Control Facilities

Check that the Doping Control Station is not too far from the field of play.

The Doping Control Station should be dedicated to dope testing only. If this is not possible, ensure that the area provided will be closed to all except the sample collection personnel as specified in the FIH Anti-Doping Rules and relevant WADA International Standards. A guard may be needed to prevent unauthorised persons entering the station.

Ensure that the station has a waiting room, a separate doping control room and a toilet; refreshments must also be available.

Check that it is equipped with the required material as specified in the FIH Anti-Doping Rules.

Check the details of the sample collection procedures as specified in the FIH Anti-Doping Rules, ensure that the Sample Collection kits are not out of date.

Check the local transport arrangements including adequate transport for everyone involved if dope testing extends after the scheduled departure time of the teams and officials from the ground.

Check that all doping control personnel have appropriate identification and have been briefed and trained appropriately.

FIH MEDICAL OFFICER	LOCAL MEDICAL OFFICER
Check the facilities at team hotels	
Check that there is adequate space for each team's physiotherapist to treat the team members.	
Inquire about in residence medical facilities (ie day and night), availability of LMO.	
It could be handy to ask the hotel desk to print out a list of all the team participants and their room number, so you are well informed.	

4.4 THERAPEUTIC USE EXEMPTION (TUE)

FIH MEDICAL OFFICER	LOCAL MEDICAL OFFICER
<p>If the medication or method an athlete requires to treat an illness or condition happens to fall under the Prohibited List, a Therapeutic Use Exemption (TUE) may give that athlete the authorization to take the needed medicine or method. TUEs are granted according to art. 4.4. of the FIH Anti-Doping Rules and the International Standard for TUEs (ISTUE).</p> <p>An application for a TUE must be made to FIH as soon as the need arises. For substances prohibited In-Competition only, the Athlete should apply for a TUE at least 30 days before the next competition.</p> <p>If the Athlete already has a TUE granted by his/her National Anti- Doping Organization, FIH may recognize this TUE for international level competition, provided that such TUE decision has been reported in ADAMS in accordance with Article 5.4 of the International Standard for Therapeutic Use Exemption (ISTUE), and a complete medical file from a specialist doctor is available.</p>	
<p>If an athlete makes a late application during the tournament FIH cannot guarantee that the exemption will be processed, and the exemption granted. Consequently, the athlete could be selected for dope testing and if a positive test is recorded could be subject to penalties provided in the FIH Anti-Doping Rules.</p>	<p>Refer any late applications for TUEs to the FMO.</p>

FIH MEDICAL OFFICER	LOCAL MEDICAL OFFICER
An Athlete may only be granted retroactive approval for a TUE in case of emergency treatment or of an acute, or other exceptional circumstances.	

4.5 UMPIRES

FIH MEDICAL OFFICER	LOCAL MEDICAL OFFICER
Attend the umpires' fitness session activity to become familiar with them and ascertain any pre-existing medical requirements.	

4.6 INJURY AND WEATHER INFORMATION

FIH MEDICAL OFFICER	LOCAL MEDICAL OFFICER
<p>Check that procedures have been set up and that enough copies of printed forms are available for collecting injury and weather information:</p> <ul style="list-style-type: none"> • Match Injury Report (see the copy available on the FIH website); • Medical Incident Report - Serious Injury reports (see the copy available on the FIH website); • Team Report – Injury Summary (see the copy available on the FIH website); • Temperature and Humidity data collection (see the copy available on the FIH website); 	
<p>Check that technical table officials have been briefed on procedures for completing the Match Injury Report and that a report form will be completed for every match. Provide advice on how to assess and record the “nature of injury” information required on the form.</p>	

4.7 MEDICAL BRIEFING

FIH MEDICAL OFFICER	LOCAL MEDICAL OFFICER
The Pre-Tournament Medical Briefing is one of the pre-event meetings. Its timing will depend on the circumstances of the event. It is expected that team medical personnel be present. Liaise with FIH to reinforce the requirement for team's representatives to be at the meeting.	Attend and assist at the Pre-Tournament Medical Briefing with the FMO.
Check who is present at the meeting and the names of the doctor and/or physiotherapist for each team.	

FIH MEDICAL OFFICER	LOCAL MEDICAL OFFICER
<p>Introduce the LMO. Indicate where the LMO on duty can be found or contacted at any time during the tournament. (If possible, insert the venue map in your PowerPoint to show this and other key locations.)</p>	
<p>Explain the medical facilities at the stadium and at the team hotels, the name and phone number of the local hospital, where X-rays and ultrasound tests will be available, as well as specialist dental services.</p>	
<p>Describe the sample collection procedure:</p> <ul style="list-style-type: none"> • explain the method of player notification; • constant supervision of the selected players by a chaperone; • the requirement to come to the Doping Control Station promptly after having received notification; • the player may be accompanied by a national delegation representative (usually one of the team medical personnel); • all medications must be listed on the Doping Control Form • stress that the player must not pass urine or take a shower or ice-bath before reporting to the Doping Control Station. 	
<p>Explain how injury data will be collected. Explain how to complete the "Tournament Injury Summary" forms (one per team) and the collection system after the last match of each team.</p>	
<p>Notify the team medical personnel of any proposed meetings during the tournament. If a meeting of team medical personnel can be arranged, ensure that adequate notice of the time and venue is distributed.</p> <p>At most tournaments of up to 16 teams, scrutiny of the match schedule will usually leave time for a meeting.</p>	

4.8 DOPING CONTROL

FIH MEDICAL OFFICER	LOCAL MEDICAL OFFICER
<p>Coordinate with and assist the Sample Collection Authority (SCA) / Doping Control Officer (DCO) with all tasks and duties related to the Doping Control Procedure.</p> <p>Together with the SCA/DCO ensure that the Testing / Sample Collection Procedure is carried out in accordance with Art. 2 and 3 of Appendix 4 of the FIH Anti-Doping Rules.</p>	<p>Assist the FMO, SCA and DCO, when needed.</p>
<p>Before the tournament begins, arrange with FIH's event Sport Operations Manager and the Doping Control Officer the selection of matches and athletes to be controlled, including any target testing.</p>	<p>Note the arrangements for selection of matches and athletes to be controlled.</p>
<p>Ensure the SCA/DCO has established "chain of custody" procedures for dope testing samples in accordance with the WADA regulations.</p>	<p>Assist in the establishment of "chain of custody" procedures for dope testing samples:</p>
<p>Ensure that the Sample Collection Authority a) enters all Doping Control Forms in ADAMS; and b) emails a copy of the Doping Control Forms to the FIH Sport Coordinator by the day after the Competition; or c) gives the Doping Control Forms to the FMO who will forward this to the FIH Sport Manager for delivery to the FIH Sport Coordinator by the day after the Competition.</p>	
<p>Liaise with the SCA/DCO and FIH's event Sport Operations Manager to establish procedures.</p> <p>Ensure that agreed procedures are written down and included with the FMO reports submitted to FIH in case there is a subsequent challenge to a dope test finding.</p> <p>Note that the FIH Anti-Doping Rules require testing to be conducted in substantial conformity with the WADA International Standard for Testing and Investigations (https://www.wada-ama.org/sites/default/files/resources/files/isti_2019_en_new.pdf); see in particular sections 5.0, 6.0, 7.0, 8.0 and 9.0 of the Standard dealing respectively with the storage of samples, their transportation including documentation and the related chain of custody.</p> <p>Ensure that the Sample Collection Authority is aware that for all FIH in-completion testing the Testing Authority (TA) and the Results Management Authority (RMA) must be entered in ADAMS as FIH.</p> <p>Together with Sample Collection Authority / Doping Control Officer check that sample collection kits are intact and have not expired.</p>	

5. ACTIONS DURING THE TOURNAMENT

5.1 DOPING CONTROL

FIH MEDICAL OFFICER	LOCAL MEDICAL OFFICER
<p>Arrange a time during the relevant matches for the FIH's event Sport Operations Manager, in the presence of the DCO, to select the players to be tested. Act as an independent adjudicator of the Draw. This is usually best done at half time. Work with the DCO for the athlete notification process making the connection between the chaperone and the Team manager.</p>	<p>Ensure that the DCO is aware of and attends the selection of players to be tested.</p>
<p>The player notification form is then completed and given to the chaperone, who reports immediately after the end of the match to the team manager concerned.</p>	
<p>After ensuring that the players have been notified, monitor the escort activity and, when the athlete is ready to give a sample, go to the Doping Control Station to observe that the urine sampling procedure is carried out in accordance with the FIH Anti- Doping Rules.</p>	<p>Ensure that procedures are followed in accordance with the FIH Anti-Doping Rules.</p>
<p>Together with the DCO ensure that the athlete completes and signs the Doping Control Form. One copy is for the DCO to forward to the FIH Office the day after the Competition, one copy is for the Athlete, a special copy is to be sent to the Laboratory, and an extra copy for distribution as the FIH deems necessary.</p>	
<p>Should any results of doping controls be reported to you, inform FIH's event Sport Operations Manager immediately.</p>	

5.2 INJURY INFORMATION

FIH MEDICAL OFFICER	LOCAL MEDICAL OFFICER
<p>Injury information is collected as follows:</p> <ul style="list-style-type: none"> • a Match Injury Report form is completed by officials at the technical table for every injury which causes a time stoppage; • you complete (in liaison with team medical personnel) a Medical Incident Report - Serious Injury form for any injury which requires • significant diagnosis/treatment (e.g. hospitalisation); • you ask the team medical personnel to complete a Team Report – Injury Summary for notable injuries (e.g. injuries which require significant treatment at the pitch side and/or which result in a player being unable to resume play in that or subsequent matches). 	<p>Note how injury information is collected. Assist the FMO with this activity as necessary.</p>
<p>Use your observations of each match and/or contact with team medical personnel to identify injuries which fall into the two latter categories above. Ensure that team medical personnel include relevant injuries in the Team Report – Injury Summary.</p>	
<p>Check that appropriate information is being collected by technical table officials for the Match Injury Report form.</p>	
<p>Complete a Medical Incident Report - Serious Injury form as and when necessary.</p>	
<p>Start collecting Team Reports/Injury Summary forms from team medical personnel immediately after the pool matches and collect all remaining forms before any team departs from the tournament.</p>	

5.3 OTHER ACTIVITIES
